Amish children don't get cancer, diabetes or autism, study finds (while mainstream Americans are sick and DYING in record numbers)

New research presented by Vaccine Safety Research Foundation (VSRF) founder Steve Kirsch to the Pennsylvania State Senate shows that Amish children, who are 100 percent unvaccinated, are also free from cancer, diabetes, autism, and many other chronic illnesses from which fully vaccinated children often suffer.

America's current Amish population is around 400,000 and rising. Increasingly more people are adopting the Amish way of growing clean food and herbs and avoiding Big Pharma poisons like the Centers for Disease Control and Prevention's (CDC) vaccine schedule for children.

The states with the highest concentration of Amish residents are Pennsylvania with around 90,000 and Ohio with around 82,000. Some 32 different states have Amish communities of varying sizes.

Since the average Amish family has seven children, their population numbers are continually rising. And since they do not use modern technology, pharmaceuticals, or other things that destroy health and life, the Amish are slowly but surely replacing their go-with-the-flow American counterparts, many of whom are embracing LGBT perversion, endless vaccines, and other genocidal concepts straight from the globalists.

"The Amish value rural life, manual labor, humility, and Gelassenheit (submission to God's will) with a view neither to interrupt family time nor replace face-to-face conversations whenever possible," reports explain.

"Yet, despite rejecting all modern medicine and pharmaceutical drugs that the rest of the American people have access to, the Amish are among the healthiest in the nation.

(Related: The federal government has repeatedly gone after the Amish for flouting its regulatory apparatus in a quest to destroy America's various food sources.)

Covid deaths rates 90 times lower for Amish compared to rest of America

The difference between how the Amish fared well during the Wuhan coronavirus (Covid-19) "pandemic" compared to how the rest of America suffered needlessly is also worth noting.

Another VSRF study found that the covid death rate in Amish communities was 90 times lower than it was for the rest of America. Unlike the mind-controlled herd all around them, the Amish did not wear masks or social distance, and they certainly did not get injected with mRNA poisons and spike proteins.

has been harming the public for decades and saying nothing and burying all the data."

Dr. Peter McCullough has also testified under similar circumstances, revealing based on science that chronic illness rates are off the charts in mainstream America while the Amish are doing just fine. The difference is that the Amish do not obey the "authorities," and thus remain safe from all the poisons being pushed by the globalists.

According to the latest VSRF study, not a single Amish child has ever developed cancer, autism, heart disease, or any other such condition. This is extremely telling as to the benefits of living more like the Amish rather than like a Hollywood celebrity, a media reporter, or even some church leaders who blasphemously told their congregations that Jesus Christ himself would have gotten "vaccinated" in order to "stop the spread."

"The fully unvaccinated kids are always healthier," Kirsch stated unequivocally.

"After decades of studying the Amish, there's no report because the report would be devastating to the narrative,"" That is the key truth to our "Modern" society.

"They" took God out of the classroom, and started injecting babies with poison, around the same time. A short time later "They" introduced "Feminism" to harm the Nuclear Family.

The Amish avoided all of our "Modern" nonsense, and are thriving.
